### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/14/10 and 7/8/10 has been entered.

### ***Election/Restrictions***

2. Applicant's election without traverse of group I (claims 1-2, 4-12, and 20-21), and non-election of group II (claims 14-15) in a telephone conversation Adnan Bohri on 7/29/10 and 8/2/10 is acknowledged. This was previously noted in an interview summary requested by Mr. Bohri, which was mailed on 8/9/10. Claims 1-2, 4-12, and 20-21 are pending and were examined. As noted below in the examiner's amendment section, Mr. Bohri agreed to cancel all non-elected claims (claims 13-17) on 8/23/10 because the elected claims were in condition for allowance.

3. In order to have a complete record, the rationale for the restriction requirement is laid out as follows:

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, 4-12, and 20-21, drawn to film forming methods.

Group II, claim(s) 14-15, drawn to a method of fabricating a semiconductor device.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The two groups lack unity of invention as required for 371 applications originating from a PCT application because a source gas having a F/C ratio larger than 1 and smaller than 2 is not itself a special technical feature because it is known in the prior art.

The examiner thus interprets that group I has a first special technical feature (the source gas ratio, in combination with modifying the F-doped carbon film with radicals consisting of Ar and nitrogen) and that group II has a second special technical feature (the source gas ratio, in addition with forming a stable compound of a metal fluoride by depositing a second metal film that reacts with F).

Independent claims 1 and 10 are both in group I because they have unity of invention together (both have the first special technical feature).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

***Examiner's Amendment***

Art Unit: 2823

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Adnan Bohri (Reg. No. 62,648) on 8/23/10.

5. The application has been amended as follows (line numbers cited count fully deleted lines):

- In claim 2, at line 2, **delete** "terminating" and **insert** – that terminate -- after "atoms".
- In claim 10, at line 12, **delete** "nitrogen" – at the beginning of the line (before "radicals").
- **CANCEL** claims 13-17.

***Allowable Subject Matter***

6. Claims 1-2, 4-12, and 20-21 are allowed. The following is an examiner's statement of reasons for allowance:

7. Regarding **claims 1 and 10**, the prior art does not teach or suggest a film forming method, comprising all the limitations of claims 1 and 10, including forming a F-doped carbon film, and after forming the F-doped carbon film, modifying its chemical composition with radicals consisting of Ar and nitrogen. **Claims 2, 4-9, and 20** depend

Art Unit: 2823

from claim 1, and **claims 11-12 and 21** depend from claim 10, and are allowable for the same reasons.

The closest prior art are:

US 2003/0025209 A1 (“Jiwari”), wherein a fluorocarbon film is formed (some examples have the claimed ratio), and during the deposition, Ar plasma radicals are applied, which densify the film and improve strength, heat resistance, and chemical resistance. However, the amended forms of the independent claims require that the radicals are used after the forming of the film, and require Ar and N, which Jiwari lacks.

US 2004/0161946 A1 (“Tsai”) discusses the C/F ratio explicitly (see figure on front page) but does not use radicals such as Ar or N after forming the film.

US 6,764,939 B1 (“Yoshitaka”) forms fluorocarbon films, some having the claimed C/F ratio, and etches later with a plasma of argon, hydrogen, and nitrogen. However, the amended form of the claim requires changing the chemical composition. This thus does not encompass etching, because during etching, some material is removed but the material that remains would have the same chemical composition as it originally had.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
